## Description:

### I. Typical Activities

**BRIEF DESCRIPTION:**
Building on the OT Practice I course, OT Practice II prepares students for advanced fieldwork placements through skill development within the stages of the Canadian Practice Process Framework, including ethical decision making, clinical reasoning, professionalism, communication, clinical documentation and developing learning objectives. Students prepare for self-evaluation of professional competencies, and learn professional behaviours for clinical and community practice contexts. Students are required to become familiar with the Code of Ethics for the OT profession, the College of Occupational Therapy Prep Modules, Standards and Guidelines related to topics such as Capacity and Consent, Confidentiality, Privacy, Record Keeping, and Supervising Support Personnel. OT Practice II also provides students with core knowledge and skills related to ethical awareness, concepts, principles and reasoning. An ethical decision-making framework for occupational therapists is used to analyze cases involving: clients' capable and informed decision-making; client autonomy, risk-taking and safety; discharge planning; client sexuality; and an OT's professional role where it may conflict with personal values, beliefs and goals.

**TA duties may include:**
- Library searches for updating course readings: **5 hours**
- Marking assignments: **50 hours**
- Administration tasks: **2 hours**
- In class support: **8 hours**

### II. Laboratories

N/A
